

UNDETECTABLE = UNTRANSMITTABLE

Saving Lives & Ending the HIV Epidemic

**43%
OF CHILDREN**

with HIV are not receiving life-saving treatment

**AIDS IS
THE #1 CAUSE
OF DEATH**

among women and young people in Sub-Saharan Africa, and the 2nd leading cause of death among young people worldwide

**54%
OF PEOPLE**

living with HIV are women and girls

More than 10 million, *(an alarming 400,00+ in the United States)* of 39 million people with HIV are not accessing the information, treatment and care needed to reach an undetectable viral load to stay healthy and prevent new transmissions.

Prevention Access Campaign (PAC) is a global non-profit organization dedicated to saving lives and ending the HIV epidemic by making Undetectable = Untransmittable (**U=U**) a reality for all people living with HIV. **U=U** means that a person living with HIV who is on treatment and has an undetectable viral load cannot transmit HIV.

PAC launched **U=U** in 2016 by mobilizing global scientists and health leaders to confirm the science of **U=U** and ignited a worldwide movement of partners to share the transformational message and advocate for universal access.

“When the history of great public health accomplishments is going to be written, I guarantee you, it may not be universally accepted now, but **U=U** is going to be right up there.”

— Dr. Anthony S. Fauci

“**U=U**’s positive message gave me another chance at life. Being undetectable means I can live my life fully and motivates me to take care of my health.”

— Jasmine B. (USA)

U=U is a game-changer. It's such an amazing movement, and that's why UNAIDS is so proud to officially endorse and stand behind Undetectable = Untransmittable. **U=U** is in an official UN declaration adopted and negotiated by member states of the General Assembly. It's actually our marching order as the entire UN system and for all member states. They need to be implementing **U=U**, celebrating it, trumpeting it, and advocating about it.

— Vinay Saldanha, Director, U.S. Liaison Office, UNAIDS

Strategic Pillars

PAC’s collaborative **advocacy**, **education**, **communications** and **movement building** work has resulted in historic global changes to the official risk assessments of HIV transmission. We are changing the narrative about living and loving with HIV and paving the pathway to end the epidemic.

Educate

PAC offers training and technical support to civil society organizations, health ministries, private industry, and other stakeholders.

Communicate

PAC is the leading source for developing and delivering up-to-date, credible, and relevant information on **U=U** implementation and scale-up.

Build

PAC co-leads, builds, and strengthens the thriving and growing community-led **U=U** movement with HIV advocates, activists, researchers, & over 1,100 community partners from 105 countries.

Advocate

PAC plays a vital role in influencing policies and programs of key global, regional, and national partners to increase access and remove barriers to HIV treatment, care, and services using innovative approaches.

FROM A GRASSROOTS MOVEMENT TO A GLOBAL MANDATE

PAC pioneered **U=U** in 2016 and has since transformed the grassroots movement into a global mandate. The world’s leading scientific, medical, and public health institutions have endorsed **U=U**:

PEPFAR and The Global Fund, the largest donors of the global HIV response, require **U=U education as a core standard for ending the epidemic in more than 100 countries.**

HELP US
MAKE **U=U** A
REALITY

FOR ALL
PEOPLE LIVING
WITH HIV
